0 to 100... in 60 Seconds Flat

The Little Wonder BedShaper cuts crisp clean edges, even “S” curves, up to 100 feet per minute... Making short work of even the largest edging, bed shaping, and trenching projects. The most intricately shaped beds, smallest diameter tree rings, and tightest curved edges are a snap with the BedShaper. Its added differential and zero-turning radius offer outstanding maneuverability and precision. With a hydrostatic transmission (for infinite speed control in forward and reverse), multiple engine options, and cutting depths ranging from .5 to 4.5 inches, the BedShaper is the fastest, most powerful, and versatile self-propelled bed edger available. It cuts costs nearly as fast as it cuts through turf and can pay for itself on the first job.

Built for professional landscaping and grounds maintenance professionals, the BedShaper stands up to rigorous everyday use. The frame is constructed from welded, formed high gauge steel and the powerful 16.25” diameter notched blade is made from heat-treated spring steel and is guaranteed against chipping, breaking, bending, and delaminating for life. The angle of the cut and concave shape of the blade leaves a ribbon of soil intact for easy removal.

The Little Wonder BedShaper features:

- Multiple Engine Options: 11 hp Briggs & Stratton, 13 hp Kawasaki, or 13 hp Honda
- Hydrostatic transmission (speeds up to 100’ per minute) with a tow valve for moving the unit without engine power
- Added differential for zero-radius turns
- BladeFloat™ arm, blade continues over obstacles without stopping
- 16.25” diameter, heat-treated spring steel edger blade
- Cutting depths from .5” to 4.5”
- Optional attachment kits include: Shredder Kit & 16 lb. Blade Weight Kit
- Two-Year Commercial Warranty

The BedShaper is loaded with patented features; the BladeFloat™ lets the blade arm float over tree roots and rocks while the blade continues to cut, the Shape-Trak™ design mounts the blade in-line with the drive wheels so the blade follows the exact path of the wheels for the most precise edging, and the spring-loaded belt idler is fully enclosed for maintenance free operation.
